Who we are...

MaterCare is an international organization of healthcare professionals dedicated to the care of mothers and babies, both born and unborn, through new initiatives of service, training, research and education, which are designed to reduce the unacceptably high rates of maternal mortality, morbidity and abortion.

healthcare is a
human right.**

About MaterCare USA

MaterCare's mission is to serve the "Culture of Life" where it is most at risk – those crisis areas and hotspots where mothers and their children, born and unborn, are neglected or abandoned outright.

MaterCare USA works to raise awareness, create support for medical professionals, healthcare workers, and most importantly women and their children.

We provide resources on maternal health, nutrition and advocacy, and we are dedicated to upholding the dignity of motherhood by promoting and providing healthy positive options for women and their children.

CURRENT PROJECT, ISIOLO:

The newly operating MaterCare Maternity hospital maternity hospital in Isiolo, Kenya may be the first hospital in the world to be named after the Pope John Paul II after Pope Francis proclaimed him a saint on Sunday, April 27th, 2014. The hospital, which serves rural women and children, has been operating for the past year.

What we do

MaterCare USA would like to thank all of our supporters for making the purchase of the two motorcycle ambulances possible. The motorcycle maternity ambulances, funded and purchased by MaterCare USA, are essential for reaching remote areas to access mothers in need of care.

These are specially designed motorcycles for the transport of pregnant women.

Below: Motorcycle maternity ambulance for use in remote areas.

MaterCare USA is a not for profit registered 501 (c) 3
A financial statement is available upon written request from the
Virginia Office of Consumer Affairs

Aug. 2014

Why we do this

330,000 mothers die in pregnancy every year, the vast majority of the causes are easily preventable and 91% occur in the last three months of pregnancy. They occur mainly in sub Saharan Africa. The big difference between the developed and under developed world is in obstetrical risk.

With your support, we **can** save lives.
